

Team Offsite Planning Council Demo Walkthrough

This walkthrough demonstrates a multi-agent Claude demo designed for workshops and executive audiences. The goal is to showcase delegation, parallel research, synthesis, and human judgment.

Step 1: Frame the Demo

Say:

“We’re going to delegate research to three agents. Each one has a different lens: experience, logistics, and budget. We’ll move on, then come back and see what they found.”

Step 2: Paste the Base Prompt into Claude

You are coordinating a Team Offsite Planning Council with 3 specialized research agents.

Scenario:

We are planning a Bay Area offsite for 20 employees. The offsite should be within 2 hours of San Francisco and balance fun, practicality, and budget awareness.

Agent 1: Experience Researcher

- Research memorable destinations, restaurants, and activities
- Prioritize team bonding and unique experiences

Agent 2: Logistics Coordinator

- Research transportation, timing, parking, accessibility, and scheduling considerations
- Identify operational risks or friction points

Agent 3: Budget Analyst

- Research expected costs, high-value alternatives, and cost-saving opportunities
- Flag unusually expensive options

Work independently and in parallel.

Do not synthesize yet.

Each agent should:

- Research and present findings separately
- Include recommendations
- Include concerns or tradeoffs
- Include one “best overall” recommendation

Assume the user may return later for synthesis and refinement.

Step 3: Move On

Say:

“We’ll let the council work while we continue.”

Then move to another slide, demo, or Q&A section.

Step 4: Return to Claude

Say:

“Let’s check what the council came back with.”

Briefly review each agent’s findings and call out differences in perspective.

Step 5: Ask for Synthesis

Now act as the Offsite Director.

Review all 3 agent reports and create:

- a recommended offsite plan
- rationale for the recommendation
- key tradeoffs
- estimated budget level
- suggested itinerary
- risks the human organizer should still validate

Keep it concise and executive-friendly.

Step 6: Add a Curveball

Curveball: The budget has been reduced by 30%, and the team now needs to keep travel simple for people coming from both San Francisco and San Jose.

Revise the recommendation.

Step 7: Generate the Final Deliverable

Create a final one-page offsite brief I could send to the planning team.

Include:

- recommended option
- why it works
- sample agenda
- estimated budget range
- tradeoffs
- what we still need to confirm

Recommended Demo Arc

Delegate → Move On → Return → Synthesize → Adapt → Final Brief

Suggested closing line:

“The goal isn’t to remove decision-makers. The goal is to return to the conversation with better perspectives, stronger preparation, and fewer blank pages.”
